Introduction To Cellular Le A cell is the simplest unit of life and they are responsible for keeping an organism alive and functioning. This introduction to cells is the starting point for the area of biology that studies the various types of cells and how they work. There is a massive variety of different types of cells but they all have some common characteristics. Introduction to cells | Basic Biology This new edition of Introduction to the Cellular and Molecular Biology of Cancer provides a comprehensive overview of cancer biology, covering the current status of both research and treatment.
