Handbook (PSH) It must be stressed

that this handbook addresses

integrated physical security.

Physical security is the protection of

buildings and all their assets,

including people. Integrated

physical security recognizes that

optimum protection comes from

three mutually supporting

elements: physical security

measures, operational procedures

and procedural security measures.

That is what this five-step

methodology is based on. The

... Physical security describes security measures that are designed to deny unauthorized access to facilities, equipment and resources and to protect personnel and property from damage or harm. Physical security involves the use of multiple layers of interdependent systems that can include CCTV surveillance, security guards, protective barriers, locks, access control, perimeter intrusion detection, deterrent systems, fire protection, and other systems designed to protect persons and property.
