following ... MCQs for Chapter 2 “Land, Soil, Water,
Natural Vegetation ... The process of weathering alters
rocks at the earth's surface and breaks them down
over time into fine-grained particles of sediment and
soil. Weathering is the result of the interactions of air,
water, and temperature on exposed rock surfaces and
prepares the rock for erosion. Erosion is the movement
of the particles by ice, wind, or water. Weathering -
CliffsNotes Mechanical Weathering is also caused by
abrasion. Abrasion is the bumping of rock and
sediment into each other causing rock to break apart
and even smooth the edges of rock. Glaciers can pluck
rock out of the ground and then drag those rocks
across other rock creating glacial grooves. Water
pushes sediment down stream where it comes in
contact ... Weathering | Earth Science Physical
weathering Physical weathering occurs when rock is
broken down into smaller pieces by the effects of
temperature and water. □Exfoliation weathering (or
'onion-skin' weathering) is caused by very hot weather.

□ Freeze-thaw weathering is caused by the melting and freezing of water.
