uk.com Solution. Suppose $x, y,$ and z are elements of a
field and $x \neq 0$. The axioms (M) imply $y = 1y = 1x \times y =$
 $1x(xy) = 1x(xz) = 1x \times z = 1z = z$; proving part (a).
Part (b) follows from part (a) by setting $z = 1$, and part
(c) follows from part (a) by setting $z = 1/x$. Since $x \times 1/x$
 $= 1$; replacing x with $1/x$ in part (c) gives part (d).

2 Part A Solution to Principles of Mathematical Analysis Chapter 2 Part A Linearity Solution to Principles of Mathematical Analysis Chapter 2 ... Apparently the standard reference for the Chapter 9 and 10 material is Spivak's Calculus on Manifolds. As I recall, it works its way to Stokes Theorem by defining differentiable manifolds (which is the most abstract setting for doing calculus), tangent spaces, that sort of thing. Rudin just stays with \mathbb{R}^n , and that actually makes it harder. It might be a good idea to read Spivak (it's not very long), then come back to Rudin, and do some of the problems, which have some nice counterexamples.
