Charles F. Goldfarb Series on Open Information Management ... SGML was invented by Charles F. Goldfarb, and it was he who coined the term "markup language." It all started in 1969 when Goldfarb, leading a small team at IBM, developed a language called GML. In 1974, he created SGML and subsequently wrote the first SGML parser,

ARCSGML. Web Techniques: A Conversation with Charles F. Goldfarb XML Tree Structure XML documents are formed as element trees. An XML tree starts at a root element and branches from the root to child elements. All elements can have sub elements (child elements): XML Tree - W3Schools Each XML document has both a logical and a physical structure. Physically, the document is composed of units called entities. An entity may refer to other entities to cause their inclusion in the document. A document begins in a "root" or document entity. Logically, the document is composed of declarations, elements, comments, character references, and processing instructions, all of which are ...
