TpT The surface-area-to-volume ratio, also called the surface-to-volume ratio and variously denoted  $sa/vol$  or  $SA:V$ , is the amount of surface area per unit volume of an object or collection of objects. In chemical reactions involving a solid material, the surface area to volume ratio is an important factor for the reactivity, that is, the rate at which the chemical reaction will proceed. For a given volume, the object with the smallest surface area is a ball, a consequence of the isoperimetric inequality.
