(eBook, 1979) [WorldCat ... The principles of pollination ecology are well demonstrated in a comprehensive series of case histories, although the drawings which illustrate them would have benefited from a more diagrammatic presentation. In two short chapters, on pollination ecology and speciation The Principles of Pollination Ecology. DOI: 10.1093/obo/9780199830060-0121. Introduction. Pollination is the transfer of pollen from anthers to a stigma, a process that can be effected by abiotic vectors such as wind and water and by a diversity of

animals, including insects, birds, and mammals. It is worth noting, however, that the definition of pollination is somewhat variable, in that some authors (e.g., Faegri and van der Pijl 1979, cited under General Overviews) include the transfer of pollen in gymnosperms, which do not ... Pollination Ecology - Ecology - Oxford Bibliographies The Principles of Pollination Ecology by Faegri, K & Van der Pijl, L and a great selection of related books, art and collectibles available now at AbeBooks.co.uk. The Principles of Pollination Ecology by Faegri K and Van Der Pijl L - AbeBooks The Principles of Pollination Ecology by Faegri K and Van ... Pollination ecology. At least three quarters of the flowering crop and wild plant species

are fully or partly dependent on insect pollination for reproduction and a third of our global food production comes from insect pollinated crops. Honey bees are used to pollinate crops, but recent findings indicate that wild pollinators, such as bumble bees, solitary bees and hoverflies, are much more important than previously thought. Pollination ecology | Department of Biology This book on the ecological aspects of plant pollination includes several sections specifically devoted to insects as pollinators. Bees and wasps are the most important, but other groups of Hymenoptera and also Coleóptera, Diptera and Lepidoptera are likewise concerned. It is noted that, so far as is known, only adult insects act as pollinators. The principles of

pollination ecology. The goal of this special section of Landscape Ecology is therefore to further motivate landscape ecologists to pursue both fundamental and applied aspects of landscape-pollination ecology. In this special section, we have assembled leading-edge examples of a burgeoning field that merges landscape and pollination ecology.
